

- **Homework** is due by 11:59PM on the due date.
- Turn in your homework via Gradescope.  
Gradescope is accessed via Canvas.  
Technology help page: <https://uaf-math251.github.io/techHelp.html>
- Numbered problems come from our online textbook:  
<https://openstax.org/details/books/calculus-volume-1>
- Frequently Written Homework Assignments will have some added problems not from the text.
- Complete solutions to all Written Homework problems can be found in our Canvas course under the Assignments tab.
- Homework will be graded on completion and effort.

#### HOW TO GET FULL CREDIT

- Since you have answers and complete solutions to all problems, you are graded based on completion. Thus, **you should get 100% on your homework.**
- You are expected to make grading your homework easy for the graders.
- Number all problems and all parts of a problem.
- Write the problems in order.
- Write legibly and space things so they are easy to find.
- Follow directions. **When you are asked for an explanation, make sure to give one!**
- Turn your homework in on time or in advance.

#### MAKE THE HOMEWORK INTO QUIZ/TEST PREP

- Work every problem on every assignment.
- Attempt all problems at least two days before they are due so that you can ask questions if there is something you don't understand.
- For each problem, attempt it independently first *before* looking at the answers or getting help of any kind.
- Star problems you did correctly on the first try.
- *Circle* problems where you got help (using solutions, videos, a tutor, etc). You need to practice more problems like the ones you circled in order to be ready for quizzes.
- **Understand that if you copy the solutions instead of working the problems on your own, you are sabotaging your chances of success in this and future courses.**
